

# METHOD FOR SUBSCRIBER AVAILABILITY IN A RADIO COMMUNICATIONS SYSTEM

## Abstract of the Disclosure

5           The invention pertains to a method for reaching subscribers in a radio  
communication system in which an object identification is temporarily assigned to the  
subscribers. The temporary object identifications are formed by subscriber data sets that  
respectively define a complete subscriber environment of a virtual communication  
network VP within the radio communication system, wherein one or more of such  
10       subscriber data sets can be assigned to subscribers of the communication system.
